(a) Findings

Congress makes the following findings:

(1) Honey is produced by many individual producers in every State in the United States.

(2) Honey and honey products move in large part in the channels of interstate and foreign commerce, and honey which does not move in such channels directly burdens or affects interstate commerce.

(3) In recent years, large quantities of low-cost, imported honey have been brought into the United States, replacing domestic honey in the normal trade channels.

(4) The maintenance and expansion of existing honey markets and the development of new or improved markets or uses are vital to the welfare of honey producers and those concerned with marketing, using, and processing
