§ 5201. Findings

Congress finds that—

- (1) United States agricultural exports have declined by more than 36 percent since 1981, from \$43,800,000,000 in 1981 to \$27,900,000,000 in 1987;
- (2) the United States share of the world market for agricultural commodities and products has dropped by 20 percent during the last 6 years;
- (3) for the first time in 15 years, the United States incurred monthly agricultural trade deficits in 1986;
- (4) the loss of \$1,000,000,000 in United States agricultural exports causes the loss of 35,000 agricultural jobs and the loss of 60,000 non-agricultural jobs;
- (5) the loss of agricultural exports threatens family farms and the economic well-being of rural communities in the United States;
- (6) factors contributing to the loss of United States agricultural exports include changes in world agricultural markets such as—
 - (A) the addition of new exporting nations;
 - (B) innovations in agricultural technology;
 - (C) increased use of export subsidies designed to lower the price of commodities on the world market;
 - (D) the existence of barriers to agricultural trade;
 - (E) the slowdown in the growth of world food demand in the 1980’s due to cyclical economic factors, including currency fluctuations and a debt-related slowdown in the economic growth of agricultural markets in certain developing countries; and
