REFERENCES IN TEXT

The National Health Promotion and Disease Prevention Act of 1976, referred to in par. (3)(B)(i), probably means Pub. L. 94-317, June 23, 1976, 90 Stat. 695, which enacted sections 300u to 300u-5 of this title, amended sections 201, 243, 247b, 247c, 264, 300f, 4801, 4831, and 4841 to 4843 of this title, and enacted provisions set out as notes under sections 201, 247b, and 247c of this title. For complete classification of this Act to the Code, see Tables.

Such date of enactment, referred to in par. (3)(B)(ii), probably means the date of approval of Pub. L. 94-317, which was June 23, 1976.

AMENDMENTS

1992—Par. (3)(B)(i). Pub. L. 102-531 substituted “Centers for Disease Control and Prevention” for “Center for Disease Control”.

1976—Par. (3). Pub. L. 94-317 substituted provisions redefining standards for lead in paint and procedures used to determine such standards, for provisions defining standards of lead-based paint to be paint containing more than five-tenths of 1 per centum of lead by weight prior to Dec. 31, 1974, and after such date, paint containing more than six one-hundredths of 1 per centum of lead by weight, except where the Chairman of the Consumer Product Safety Commission determined that the pre-1974 level was safe, then such level to become effective.

1973—Par. (3). Pub. L. 93-151 amended par. (3). Prior to amendment, par. (3) defined “lead-based paint” to mean any paint containing more than 1 per centum lead by weight (calculated as lead metal) in the total non-volatile content of liquid paints or in the dried film of paint already applied.

§ 4851. Findings

The Congress finds that—

(1) low-level lead poisoning is widespread among American children, afflicting as many as 3,000,000 children under age 6, with minority and low-income communities disproportionately affected;

(2) at low levels, lead poisoning in children causes intelligence quotient deficiencies, reading and learning disabilities, impaired hearing, reduced attention span, hyperactivity, and behavior problems;

(3) pre-1980 American housing stock contains more than 3,000,000 tons of lead in the form of lead-based paint, with the vast majority of homes built before 1950 containing substantial amounts of lead-based paint;

(4) the ingestion of household dust containing lead from deteriorating or abraded lead-based paint is the most common cause of lead poisoning in children;

(5) the health and development of children living in as many as 3,800,000 American homes is endangered by chipping or peeling lead paint, or excessive amounts of lead-contaminated dust in their homes;

(6) the danger posed by lead-based paint hazards can be reduced by abating lead-based paint or by taking interim measures to prevent paint deterioration and limit children's exposure to lead dust and chips;

(7) despite the enactment of laws in the early 1970's requiring the Federal Government to eliminate as far as practicable lead-based paint hazards in federally owned, assisted, and insured housing, the Federal response to this national crisis remains severely limited; and

(8) the Federal Government must take a leadership role in building the infrastructure—including an informed public, State and local delivery systems, certified inspectors, contractors, and laboratories, trained workers, and available financing and insurance—necessary to ensure that the national goal of eliminating
